PROFESSIONAL SUMMARY

Design technologist with experience building operational interfaces, dashboards, prototypes, and design-system documentation across healthcare, compliance, and multi-brand service environments. Combines Figma, HTML/CSS, AI-assisted development, CRM logic, and systems thinking to translate complex workflows into clear product experiences for teams managing operational complexity.

CORE SKILLS

Design Systems	UX/UI Systems	Component Patterns
Figma	HTML/CSS	Storybook
GitHub	Replit	AI-Assisted Development
Workflow Automation	Dashboard UX	Responsive Layouts
Accessibility-Aware UI	Product Prototyping	Operational SaaS UX

SELECTED BUSINESS IMPACT

- Led marketing, UX, and systems work across 6+ healthcare, wellness, aesthetics, men's health, hair restoration, and procedure-based service lines.
- Built Airtable CRM and attribution workflows connecting Meta leads, website inquiries, lifecycle emails, booking progression, and revenue signals.
- Improved Smooth MD lead conversion by approximately 40% in Q1 and drove 3.2x ROAS on microneedling offer testing.
- Supported Dr. Vigor campaigns reporting 5-7x ROAS, including a \$149 lab panel promo that sold out in under 72 hours.
- Reduced Dr. Neo campaign CPL from approximately \$350 to \$190 and helped increase bookings 2.4x within 60 days through revised funnel strategy.
- Processed approximately 200 Snip Snip provider profiles through an automated research and image workflow, reducing repetitive sourcing work by an estimated 90%.

EXPERIENCE

Systems Designer | Independent Consultant / Undone Design

Remote | 2023-Present

- Build product-facing UX systems, dashboards, prototypes, and operational interfaces using Figma, HTML/CSS, Replit, Airtable, Zapier, and AI-assisted development workflows.
- Create reusable interface patterns for assessment flows, reporting dashboards, lifecycle systems, and clinic-ready operational tools.
- Translate complex workflow logic into structured UI states, decision layers, and user-readable product experiences.
- Develop and document prototype systems for compliance assessment, attribution reporting, email generation, and operational templates.
- Use AI development tools to accelerate prototyping, code iteration, UX exploration, and implementation handoff while keeping final outputs structured and reviewable.

Marketing Manager + Creative Director | Time Unwind Medical Group Inc.

Southern California | 2022-2025

- Owned multi-brand marketing operations and UX-facing systems for Smooth MD, Dr. Vigor, Dr. Freeze, Dr. Sculpt, Snip Snip Vasectomy, and Dr. Neo.
- Built and maintained CRM and lead-tracking infrastructure linking paid ads, web forms, Airtable, Mailchimp, follow-up status, booking outcomes, and reporting workflows.
- Standardized multi-brand design, campaign, reporting, and asset systems to improve consistency, execution speed, and cross-team visibility.
- Designed patient-facing and internal interfaces for service education, lead follow-up, lifecycle communication, and operational decision-making.
- Translated performance data into optimizations across offer positioning, creative testing, audience messaging, CPL, ROAS, and lead quality.

Podcast Marketing Lead | BKC Podcast

Washington, DC | 2019-2021

- Led content planning, audience development, and distribution strategy for podcast growth initiatives.
 - Supported messaging, publishing cadence, and promotional positioning across digital channels.
-

SELECTED SYSTEMS PROJECTS

Mirror Storybook Design System

mirror-storybook.vercel.app

Built a Storybook-based design-system QA artifact documenting foundations, reusable UI components, interaction states, screen-level flows, accessibility notes, responsive stress tests, and design-dev handoff guidance for an affective AI product.

Meta + Airtable Analytics Dashboard

Built a lead-to-revenue dashboard connecting Meta Ads performance, CRM status, booking behavior, and attribution data for clearer campaign decisions.

Lifecycle Email Automation System

Designed service-specific lifecycle workflows across welcome, interest-based, abandonment-style, and promotional sequences using CRM logic and Mailchimp segmentation.

Guardrail HR Compliance Assessment Platform

Designed a 22-question score-based assessment system with risk drivers, answer traceability, and structured results UX for a self-serve compliance product concept.

Snip Snip Provider Pipeline

Built a workflow for approximately 200 provider profiles using API-based research, image sourcing, face validation, and structured asset organization.

TECHNICAL + PRODUCT TOOLING

Figma · Storybook · GitHub · Replit · HTML/CSS · Airtable · Zapier · Mailchimp · Meta Ads Manager · Webflow · Canva · Google Workspace · AI development tools including code assistants and prompt-driven prototyping workflows

EDUCATION

B.S. in Psychology + Cognitive Science

University of California, Irvine | 2016-2020
